History of River Edge

ℰ

ℰ River Edge began in 1950 as a county Board of Health Agency

ℰ 1994 Georgia law changed status to legislatively created public corporation serving as the foundation of service delivery for persons with mental illness, addiction, and/or developmental disabilities.

ℰ One of 25 such entities in Georgia that contracts for funding from DBHDD to provide services to the uninsured.

History of River Edge

Most individuals served are un- or publicly insured & socioeconomically challenged

Served 15,000+ youths and adults during FY 12

Serve 4 populations predominantly:
- Individuals with addiction
- Individuals with mental illness
- Adults with mental retardation
- Persons with HIV infection

River Edge Impact Footprint Outpatient Services

Residents of many of Georgia counties "vote with their feet" to be served by River Edge.

FY 13: River Edge outpatient services touch residents of 63 counties!

Darkened Counties Represent Counties of Residence of Persons Served

Welcome to iCare Recovery!

A Partnership Between River Edge Behavioral Health and View Point Health

This website is a collaborative resource developed by River Edge and View Point Health, two Georgia behavioral health care providers, as part of the SAMHSA TCE Health IT Project. On September 30th 2010, River Edge Behavioral Health Center in Macon in partnership with View Point Health in Lawrenceville were awarded a 3 year TCE Health IT grant to leverage technology in assisting SA clients track their recovery outcomes.

We plan to develop this site into a source of support for your recovery, where you can connect to resources and use tools to track and maintain your recovery. Please check back with us frequently to see what's new!

Baldwin Adult Treatment tive

Providing integrated, evidence-based and nent and recovery support services to adults with

Mission

The mission of the Baldwin Adult Treatment Court Collaborative program is to serve this community by addressing the problems of individuals who have substance abuse, mental health or co-occurring disorders and commit crimes against society. By eliminating a person's desire to use drugs and alcohol and by stabilizing the symptoms of their mental illness, we reduce their likelihood of re-arrest or involvement in more serious cases. This reduces recidivist's rates, reduces the overall crime rates and gives all of us a safer community.

Goals

1. Develop and implement sustainable processes, procedures and treatment options of a Collaborative Treatment Program for individuals with substance abuse, mental health and/or co-occurring conditions.
2. Expand diversion and increase access to treatment options for adults with behavioral health conditions who interface with the criminal justice system to include integrated primary care, trauma-informed care, and other recovery supportive services.
3. Improve public safety and the health of our community.
